SUMMARY

Self-taught full-stack developer specializing in the JavaScript/TypeScript ecosystem — Next.js, NestJS, and React Native. Currently shipping production software at Webistan.cloud, on top of building web and mobile products independently since 2022. Builds reliable products end to end — from database and API design to responsive, polished UI. Works AI-first with Claude Code and Cursor while owning architecture, code review, and the decisions that matter. Open to remote roles worldwide (UTC+4:30 — full overlap with European hours, flexible for US teams) and onsite in Kabul.

EXPERIENCE

Full-Stack Developer — Webistan.cloud Oct 2025 – Present · Kabul, Afghanistan

- Build production web applications end to end within a dev team, collaborating with a dedicated Figma design team to turn designs into responsive, working UI.
- POS System** (live across 3 branches) — Built the full backend and contributed to the frontend UI of a multi-branch point-of-sale platform: sales, inventory, suppliers, customers, deliveries, and unlimited branch operations — with offline support (IndexedDB, sync on reconnect) for unstable connections.
Next.js · TypeScript · MySQL · Prisma · Zustand · ShadCN UI · Tailwind
- SheReads** (live — shereadsapp.com) — Built the complete frontend and admin panel for a global online reading platform: book discovery, preference-based recommendations, search, filtering, and full content management.
Next.js · TypeScript · MySQL · Prisma · ShadCN UI · Tailwind · Framer Motion

Full-Stack Intern — Coding Samurai Mar 2025 – Apr 2025 · Remote

- Built Chatty, a real-time chat application (MERN + Socket.io) with JWT authentication, live messaging, and online presence.

SELECTED PROJECTS

- Fixr** (completed, solo project) — Reverse-bidding marketplace for local home services, designed and architected end to end and built AI-first with Claude Code: Expo mobile app, Next.js admin panel, NestJS backend, real-time chat, OTP auth, zone-based matching, and credit-based bidding.
NestJS · Prisma · PostgreSQL · Next.js · React Native · Expo · github.com/mostafa-meerzad/fixr
- Portfolio + Mozi** (mostafa-meerzad.vercel.app) — SEO/SSR-optimized personal site featuring "Mozi," an AI assistant I built that answers recruiter questions about my work in real time.
Next.js · TypeScript · LLM APIs
- Movie-Flex** — Mobile movie-discovery app: search, trailers, trending, and personalized recommendations via the TMDB API.
React Native · Expo · TypeScript · NativeWind

SKILLS

Frontend: React.js · Next.js · TypeScript · JavaScript · HTML5 · CSS3 · Tailwind CSS · ShadCN UI · Framer Motion · Zustand · Responsive & accessible UI

Backend: Node.js · NestJS · Express.js · Next.js API Routes · REST APIs · Socket.io · Prisma ORM · PostgreSQL · MySQL · MongoDB

Mobile: React Native · Expo · NativeWind

Tools: Git · GitHub · Claude Code · Cursor · Docker · Vercel · Postman · Linux CLI · Figma handoff

CERTIFICATIONS

freeCodeCamp: Responsive Web Design · Front-End Development Libraries · Back-End Development and APIs · JavaScript Algorithms and Data Structures

EDUCATION

Kabul University — Computer Science (Information Systems) · 2019–2021
Admitted via the national Kankor exam; completed 4 semesters before the 2021 political crisis, then moved to self-directed, project-based learning.

GitHub: github.com/mostafa-meerzad — 160+ public repositories · Peaked #6 nationally in GitHub contributions, Afghanistan (Sept 2025)
